DETAILED ACTION***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-15, drawn to compounds according to claim 1 wherein Z is carbon, classified in class 546, subclass 122+.
- II. Claims 1-15, drawn to compounds according to claim 1 wherein Z is nitrogen, classified in class 544, subclass 253.
- III. Claim 16-18, drawn to method of use or treatment wherein Z is carbon, classified in class 514, subclass 299+.
- IV. Claim 16-18, drawn to method of use or treatment wherein Z is carbon, classified in class 514, subclass 299+.

Inventions of Groups I, II and Groups III, IV are related as product and method of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) that the process for using the product as claimed can be practiced with another materially different product or (2) that the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process of using the product as claimed can be practiced with another materially different product, such as 7,6 dihydro-2,5,8-trisubstituted-7-oxo-pyrido[2,3-d]pyrimidine-6-carboxylic acid derivatives (US 4,215,216), pyrazole compounds (US 6,727,251), certain pyridopyrimidines (US 4,113,859), compounds of heteroaryl substituted imidazole (US 6,730,683), substituted anilinic piperidines (US 6,727,246), 5-chloro-7,8-dihydro-

7-oxo-pyrido[2,3-d]pyrimidine-6-carboxylic acid derivatives (US 4,233,446), for example.

The invention of Groups I, II, III and IV are separate and patentably distinct because there is no patentable co-action among them and a reference anticipating one member will not render another obvious.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and different classification, a search of the four groups designated above would impose an undue burden upon the examiner, and restriction for examination purposes as indicated is proper.

A telephone call was made to Robert Hall on 5/7/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chukwuma O. Nwaonicha whose telephone number is 571-272-2908. The examiner can normally be reached on Monday thru Friday, 8:30 am to 5:00pm.
